Hi folks, as you may have heard from EPA we are facing what we hope will be a brief delay in the start of work at 10.9. This may affect the timing of the CAG tour. We will keep you posted on progress and can talk more as the date nears. Any questions in the interim please feel free to contact us or EPA. Thanks and talk to you soon.

Hi Ray,

I will be your point of contact to coordinate this event with the CAG. The goal of the CAG is to be able to see the activity in action and talk a bit about how dredging and transportation are taking place as well as the monitoring program. It is always good to see things in person to get a real-life perspective.

A couple of logistical issues and questions that I have are provided below, happy to have a discussion at any time to refine the details.

Date

August 1 is a placeholder and we would like to keep it if it makes sense, but if there is a better date or day of the week to really see what is going on, that would be fine.

Time

Ideally, we would like to get there as late in the day as possible to make it accessible to a number of people, but we would want to get there in time to actually see some operations, so please suggest what makes sense from your end.

Location

We are assuming that we will come to the park and observe from the bank, let us know if that makes the most sense and whether there are any other logistical issues we should take into account.

Transportation

I think we will meet in the Church parking lot and carpool up to the site. Does the CPG have access to any vans that might be used to transport multiple people? We are trying both to provide transport and limit the number of vehicles.

Let me know how you want to proceed, look forward to talking with you

Hi Ray

Yes, we just discussed with EPA the our summer CAG schedule and the prospect of scheduling a site visit to observe the dredging project on August 1. Should we start working with you to plan this?
Thanks, Debbie

Hi Debbie hope all is well. I noticed on the ourpassaic site there is a reference to a CAG meeting on August 1 that could involve a site visit at 10.9. Just wanted to see if that is still the plan so we can make sure we are prepared if needed. Thanks.

Ray

Thank you for sharing with us. We will be sure to make sure this is distributed to the CAG listserv (Doug, can you do that?) and we spread the word about the meeting. Debbie

Subject: 10.9

Hi folks I hope you are getting ready for a fun Memorial Day. We have been working closely with the EPA on preparation for the June 5 meeting in Lyndhurst regarding 10.9. I just wanted to make sure you had information related to that event and the latest plans for work at that site. The attached letter and fact sheet is being mailed to residents within about a 2 block radius of the park on both sides of the River. It will also be provided to others who have expressed interest in the project.

There is also a web page at www.rm109.com and there should be something posted on the Township website shortly.

All this information has been reviewed and approved by EPA and you may have received it from them already. But here it is just in case. Talk to you soon.
